

Kenworth Adds Meritor Permalube RPL Series Drivelines

KIRKLAND, Wash. – Kenworth has added Meritor Permalube™ RPL Series Drivelines as an option on selected, new Kenworth Class 8 on-highway trucks.

In addition, the Permalube RPL Series Drivelines are backed by a 5-year, 500,000-mile warranty for linehaul applications, according to Meritor.

Kenworth Truck Company is the manufacturer of The World's Best® heavy and medium duty trucks. Kenworth's Internet home page is at www.kenworth.com. Kenworth is a PACCAR company.

Meritor's Permalube RPL drivelines feature permanent lubrication to help reduce operating and maintenance costs – plus they offer high torque capacities.

Nylon thrust washers eliminate metal contact points to prevent wear. Triple-lip seals on U-joints help keep contaminants out. Advanced sealing features include an E-coated, protective steel guard that holds the slip seal securely and guards against contaminants and debris.

“Meritor did an excellent job of engineering this Permalube RPL driveline series with no maintenance in mind, which is a huge benefit to our customers,” said Kurt Swihart, Kenworth marketing director. “What's more they provide extended U-joint life, especially important when gearing is set for gear-fast/run-slow operations.”
