

Kenworth T680 and T880 Offer Meritor WABCO OnGuardACTIVE as Option

KIRKLAND, Wash. – Kenworth is making Meritor WABCO OnGuardACTIVE™ available as an option on Kenworth T680 and T880 models.

OnGuardACTIVE™

The All Season System 

The advanced radar-based safety system is “always on” and features forward collision warning, collision mitigation and adaptive cruise control. The system measures the truck’s position in relation to other vehicles and objects; detects moving, stopped or stationary vehicles ahead; and uses audible, visual and short brake pulse warnings to alert the driver of a possible rear-end collision. When appropriate, OnGuardACTIVE will apply the brakes to help avoid or mitigate a rear-end collision.

For more information, visit Meritor WABCO’s website (www.meritorwabco.com) or contact your Kenworth dealer.

About Meritor WABCO

Meritor WABCO is a North American joint venture focused on the delivery of proven, integrated safety technology and efficiency components. These include braking systems and controls, active safety systems, and suspension and control systems for commercial vehicles in North America.

About Kenworth
